We at AFD are proud to have successfully served engineers, architects, contractors and businesses.

Below you'll find some of the projects we've completed and above a list of the services we offer.

We are proud to offer a solution-based approach to air balancing, as we have maximized the performance of hundreds of HVAC systems. This being our primary strength we bring to your projects: Solutions! Not just "match the numbers" balancing. We offer design/build partnerships for new projects as well as independent auditing of existing HVAC systems. Please call us at anytime.
